COMMUNICATION SYSTEM:

We have implemented a communication system in order to be able to contact and inform parents and staff members of emergency situations, inclement weather, school cancellations, early dismissals, and important events. The system will contact your home phone, cell phone, and email.

This is an automated phone system that can quickly place thousands of recorded calls. The system is a beneficial tool in providing communication to parents, whether at home or at work. The application and features are specifically designed for pre-school and school-age use.

In order to facilitate the implementation, we need you to fill out the attached form with your current information. If there is a change in any of your information, it is necessary for you to contact the Director, or Assistant Director, at your child's school so that this information can be updated.

The purpose of gathering the most current, accurate information for how to reach you is so that we can establish the best possible form of communicating with you quickly when it is most necessary. Of course, all of your information is **strictly confidential**, and will be used solely for the purpose of utilizing this system to contact our parents in an emergency, or for dispensing important information.

Best Regards,

MAXINE J. WORTH
Executive Director
